

DISCOVERY ALARMSYSTEM

SKIOLD MAKES THE DIFFERENCE!

The SKIOLD alarmsystem gives a safe alert in case of temperature-exceedings in the stables. The system not only surveys just the temperature in the stables, but also the systems own functions like batteries, sensors, sireens a.o. On the Discovery all settings are set from the controlpanel itself. Discovery has facilities as collecting of data,PC-connection a.o. Connection/Disconnection of surveillance of single stables together with test and reset are carried out from the controlpanel. The alarmsystem can be connected to telephone-call-alarm.

The Call Unit has: Setting of 4 optional telephone numbers, Voice-message

Alarmcall can be given to: A standard telephone, Public Paging Service, Cellphone
